

一站式客製化服務

One-Stop Service

偉喬生醫致力於生物技術的創新，秉持著MIT的在地精神，創造世界級的技術水準。
為了提供給您更高品質的服務，進一步取得ISO13485及GMP品質系統認證。
從基因合成到抗體診斷試劑套組開發，我們提供一站式客製化服務，竭誠滿足您的研究託付。

免疫原製備
Antigen Design
and Preparation

單株抗體製備與純化
Monoclonal Antibody
Development

序列優化與基因合成
Sequence Optimization
and Synthesis

多株抗體製備與純化
Polyclonal Antibody
Development

重組抗體製備
Recombinant Antibody
Production

融合瘤細胞定序
Hybridoma Sequencing

藥物動力學分析
Pharmacokinetic
Study Service

單株抗體人源化
Antibody Humanization

診斷試劑與平台開發
Diagnostic Platform
Development (IVD)

全方位的團隊 *Details Make Our Profession*

給您全面性的服務!!

Synthesis Service

- Gene synthesis | Gene synthesis and plasmid construction service
- Peptide synthesis | Peptide synthesis and modification service

Protein Service

- Protein production | Protein expression and purification (*E. coli* system)
| Protein expression and purification (Mammalian cell system)
- Protein interaction | Biacore™ kinetic measurement service
| Yeast Two-Hybrid screening service
- Proteomic service | Protein 2D electrophoresis analysis service
| Protein PTM site identification service
| Protein identification service (Tandem mass spectrometry)
| Comparison analysis of relative proteomic profile (iTRAQ)

Antibody Service

- Antibody development | Polyclonal antibody development service
| Monoclonal antibody development service
- Antibody engineering | Hybridoma sequencing service
| Anti-idiotypic antibody production service
| Recombinant antibody production service
| Antibody humanization service
- Antibody application | Antibody conjugation service
| Antibody pairing service

CRO/ODM Service

- Assay platform development | ELISA kit development
| Lateral flow assay development

Comprehensive service / More services you need!
