

Annexin V-FAM + 7-AAD Apoptosis Detection Reagent

Catalog Number	LDG0011RB
Package	100 rxn / Customized package

For full product information, images and publications, please visit [our website](#).

Overview

Description

Leadgene fluorescent dye (FAM) conjugated Annexin V is highly purified product. During early apoptosis, cells will translocate membrane phosphatidylserine (PS) from the inner face of the membrane to the cell surface.

7-Aminoactinomycin D (7-AAD) is a fluorescent chemical compound with a strong affinity for DNA. It can be used in flow cytometry to evaluate the cell cycle and cell viability during apoptosis. The product can be used in one-step staining procedure without wash step within 20 minutes.

Components

Package	Items	Quantity
100 rxn	Annexin V-FAM	1 vial (0.5 mL)
	7-AAD	1 vial (0.5 mL)
	10× Binding Buffer	3 vials (2 mL)

Specifications

Reactivity

Mammalian

Application

Cell apoptosis assay

Detection Method

Fluorescent

Sample Type

Adherent cells | Suspension cells

Instruction

Shipping

The product is shipped with polar packs. Upon receipt, store it immediately at 2-8°C for long term storage.

Stability & Storage

This product is stable after storage at:

- 2-8°C for 12 months under sterile conditions from date of receipt.

Protect from light.

Disclaimer : For Research Use or Further Manufacturing Only.
