Overview

Description

Hepatitis B virus (HBV) is the major pathogenic factor for inducing acute, chronic liver disease, cirrhosis, and hepatic carcinoma in human. HBV surface protein antigen (HBsAg) is a protein that contains small (S), medium (M) and large (L) proteins. Large HBsAg contains preS1, preS2, and small proteins, which play an important role in HBV replication and infection. The HBV PreS1 Antibody is the specific antibody for preS1 detection.

Product Note

Recommended dilution factor:

ELISA: 1:5000-20000

WB: 1:1000-5000

IFA: 1:500-1000

Note: Working dilution for specific application should be determined by the investigator to obtain the best conditions.
