

## Anti-DENV NS1 IgG Antibody

**Catalog Number** LDG0202YA

**Package** 100 µg / Customized package

For full product information, images and publications, please visit [our website](#).

### Overview

#### Description

Dengue virus belongs to the family Flaviviridae, genus Flavivirus and consists of four distinct serotypes (DENV1 to 4). Dengue virus is transmitted by mosquitos majorly of species Aedesaegypti and Aedes Albopictus that widespread around tropics and subtropics. NS1 is a highly conserved glycoprotein of dengue virus. At acute stage of dengue virus infection (1-9 days after onset of fever), NS1 will be released from infected cells into the circulation.

### Specifications

#### Clonality

Recombinant Human IgG

#### Reactivity

Dengue virus

#### Conjugation

Unconjugated

#### Storage Buffer

Phosphate Buffered Saline containing 0.03% Proclin 300, pH 7.4.

#### Form

Liquid

#### Immunogen

Dengue virus NS1

#### Application

ELISA, LFA

#### Concentration

Lot-dependent, please refer to product label.

#### Specificity

NS1
