

Human Activin B, His Tag, E. coli

LDG064PHE **Catalog Number Package** $5~\mu g$ / $20~\mu g$ / $100~\mu g$ / Customized package

Specifications

Species of Origin

Human

Affinity Tag

His Tag (C-term)

Purity

>98% as determined by SDS-PAGE analysis.

Activity

Measure by its ability to induce hemoglobin expression in K562 cells. The ED50 for this effect is <0.7 ng/mL. The specific activity of recombinant human Activin B is $> 1.5 \times 10^6 \text{ IU/mg}.$

Form

Lyophilized

Expression System

Escherichia coli

Storage Buffer

Lyophilized from a 0.2 µm filtered solution of PBS, pH 8.0.

Molecular weight

The protein has a calculated MW of 13.75 kDa. The protein migrates as 14 kDa under reducing condition (SDS-PAGE analysis).

Endotoxin Level

<0.1 EU per 1 μ g of the protein by the LAL method.

Background

Activin B is the cytokine of the TGF-beta family, which is a 13 kDa protein containing 115 amino acid residues. Activin B has the wide variety of biological function including stem cell differentiation, inflammation, bone remodeling and neural development. They also have a role in regulation of FSH secretion. Activin B induces the phosphorylation of Smad which binds the smad binding element.

Uniprot ID

#P09529

Synonyms

Inhibin beta B chain, Activin beta-B chain, INHBB

Sequence Note

Gly293-Ala407

Instruction

Reconstitution

It is recommended to reconstitute the lyophilized protein in sterile H_2O to a concentration of 200 $\mu g/mL$ and incubate the stock solution for at least 20 min to ensure sufficient re-dissolved.

Stability & Storage

This product is stable after storage at:

- -20°C for 12 months in lyophilized state from date of receipt.
- -20°C or -80°C for 1 month under sterile conditions after reconstitution.

Avoid repeated freeze/thaw cycles.

Shipping

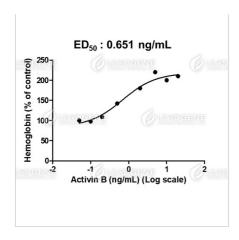

The product is shipped with polar packs. Upon receipt, store it immediately at -20°C or lower for long term storage.
