

# Leadgene® XenoForm Tumor Gel

Catalog Number	LDG0006RO
Package	25 rxn / 50 rxn

For full product information, images and publications, please visit our website.

## **Overview**

#### **Description**

XenoForm Tumor Gel is made from synthetic biological materials, which can provide extracellular matrix microenvironment without the risk of zoonotic pathogens or toxins. It has high activity, stability, biocompatibility, safety, and can be operated at room temperature. It is also easy to inject and allows self-adjustment of gel density. This product can be used in tumor growth experiments with various mouse cancer models.

#### **Components**

Package	Items	Quantity
25 rvn	Tumor forming Gel (1X)	1 vial (2.5 mL)
25 rxn	Dilution Buffer (1X)	1 vial (2.5 mL)
E0 m/n	Tumor forming Gel (1X)	1 vial (5 mL)
50 rxn	Dilution Buffer (1X)	1 vail (5 mL)

# **Specifications**

**Application** 

In vivo tumor formation assay

## Instruction

Tainan Headquarter

**Taipei Office** 

### **Shipping**

The product is shipped with polar packs. Upon receipt, store it immediately at 2-8°C for long term storage.

### **Stability & Storage**

This product is stable after storage at:

 2-8°C for 24 months in lyophilized state from date of receipt.

**Disclaimer:** For Research Use or Further Manufacturing Only.
