

## **Anti-DENV Capsid Antibody [Clone 25-4]**

Catalog Number	LDG0014YA
Package	100 μg / Customized package

For full product information, images and publications, please visit our website.

### **Overview**

### **Description**

Dengue virus belongs to the family Flaviviridae, genus Flavivirus and consists of four distinct serotypes (DENV1 to 4). Dengue virus is transmitted by mosquitos majorly of species Aedes aegypti and Aedes Albopictus that widespread around tropics and subtropics. Capsid protein is a small protein with very particular structural features, playing an integral role in replication and pathogenesis. Capsid protein interacts with host components, and thus is the potential drug target against DENV infection.

#### **Product Note**

Recommended dilution factor:

ELISA: 1:5000-20000 WB: 1:1000-5000 IFA: 1:500-1000

FACS: Assay dependent

Note: Working dilution for specific application should be determined by the investigator to obtain the best conditions.

# **Specifications Clonality** Host Monoclonal Mouse **Clone Name** Isotype clone 25-4 IgG2b

**Immunogen** 

Dengue virus Capsid

**Application** 

ELISA, WB, IFA, FACS

Concentration

1 mg/mL

**Specificity** 

capsid

Reactivity

Dengue virus

Conjugation

Unconjugated

**Buffer** 

Phosphate Buffered Saline containing 0.03% ProClin 300, pH 7.4.

**Form** 

Liquid

### Instruction

### **Shipping**

The product is shipped with polar packs. Upon receipt, store it immediately at -20°C or lower for long term storage.

### **Stability & Storage**

This product is stable after storage at:

- 2-8°C for 2 weeks under sterile conditions from date of receipt.
- -20°C or -80°C for 12 months under sterile conditions from date of receipt.

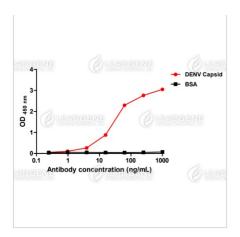

Avoid repeated freeze/thaw cycles.

Suggestion: Divide antibody into several vials.

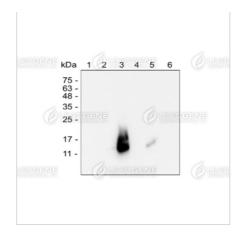

Keep only vials for usage at 2-8°C.
