

DENV NS1 Protein, His Tag, HEK293

Catalog Number LDG001PVM

Package 5 µg / Customized package

For full product information, images and publications, please visit [our website](#).

Specifications

Species of Origin

Dengue virus

Affinity Tag

His Tag (C-term)

Purity

>95% as determined by SDS-PAGE analysis.

Form

Lyophilized

Expression system

HEK293 cell

Buffer

Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4.

Molecular weight

The protein has a calculated MW of 40.06 kDa.

Background

Dengue virus (DENV) is common mosquito-borne infection and a major cause of morbidity in tropical and subtropical regions. DENV NS1 protein is containing 353 amino acids with polyhistidine tag at the C-terminus. DENV NS1 protein plays an important role in viral replication and viability. And DENV NS1 has been shown to co-localize with dsRNA and other components of viral replication complexes in viral-induced vesicle packets.

Uniprot ID

#P29990

Synonyms

Genome polypeptide

Sequence Note

Asp776-Ala1127

Instruction**Reconstitution**

It is recommended to reconstitute the lyophilized protein in sterile H₂O to a concentration not less than 200 µg/mL and incubate the stock solution for at least 20 min to ensure sufficient re-dissolved.

Stability & Storage

This product is stable after storage at:

- -20°C for 12 months in lyophilized state from date of receipt.
- -20°C or -80°C for 1 month under sterile conditions after reconstitution.

Avoid repeated freeze/thaw cycles.

Shipping

The product is shipped with polar packs. Upon receipt, store it immediately at -20°C or lower for long term storage.

Disclaimer : For Research Use or Further Manufacturing Only.
