

## Anti-IL-10 Antibody [Clone 17-1]

**Catalog Number** LDG0031YA **Package** 100 µg / Customized package

For full product information, images and publications, please visit our website.

### **Overview**

### Description

Interleukin-10 family is a group of cytokine, maintains tissue homeostasis during infection and inflammation. IL-10, a member of the IL-10 family, is an anti-inflammatory cytokine has pleiotropic effects in immunoregulation and inflammation, produced primarily by monocytes. IL-10 is also known as cytokine synthesis inhibitory factor (CSIF), plays an essential role in preventing inflammatory and autoimmune pathologies.

#### **Product Note**

Recommended dilution factor:

ELISA: 1:5000-20000 WB: 1:1000-5000 IFA: 1:200-1000

FACS: Assay dependent

Note: Working dilution for specific application should be determined by the investigator to obtain the best conditions.

# **Specifications** Host Clonality Monoclonal Mouse Isotype Clone Name lgG1 clone 17-1 Immunogen Reactivity Interleukin 10 Human

Tainan Headquarter

**Innovation & Research Center** 

**CLD Center** 

**Application** 

ELISA, WB, IFA, FACS

Concentration

1 mg/mL

**Specificity** 

Interleukin 10

Conjugation

Unconjugated

**Buffer** 

Phosphate Buffered Saline containing 0.03% ProClin 300, pH 7.4.

**Form** 

Liquid

### Instruction

### **Shipping**

The product is shipped with polar packs. Upon receipt, store it immediately at -20°C or lower for long term storage.

### Stability & Storage

This product is stable after storage at:

- 2-8°C for 2 weeks under sterile conditions from date of receipt.
- -20°C or -80°C for 12 months under sterile conditions from date of receipt.

Avoid repeated freeze/thaw cycles.

Suggestion: Divide antibody into several vials. Keep only vials for usage at 2-8°C.

## **Image**

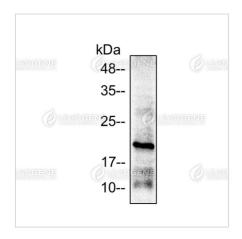

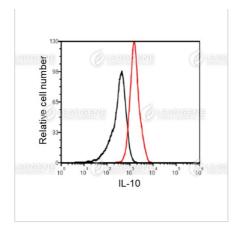

Immunofluorescence analysis of Anti-IL-10 Antibody [Clone 17-1] HeLa cells were fixed in 4% PFA, permeabilized with PBS containing 0.1%

Triton X-100. Cells were stained with mouse anti-IL-10 monoclonal antibody (1:200) followed by secondary antibodies (goat anti-Mouse IgG-iFluor 488,

1:400, green) and cell nuclei were stained with Hoechst 33342 (Blue).

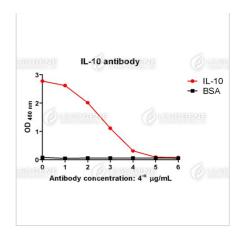

Western blotting analysis of Anti-IL-10 Antibody [Clone 17-1] Hela cell lysates (30 µg) were stained with mouse anti-IL-10 monoclonal antibody [Clone 17-1] at 1:5000 dilution.

FACS analysis of Anti-IL-10 Antibody [Clone 17-1]

Ramos cells were stained with mouse anti-IL-10 monoclonal antibody at 2 μg/ml (red) and without antibody control (black).

ELISA titration of Anti-IL-10 Antibody [Clone 17-1] Titration curve of anti-IL-10 antibody in ELISA. Red: IL-10; Black: BSA

(negative control).
