Overview

Description

Dengue virus belongs to the family Flaviviridae, genus Flavivirus and consists of four distinct serotypes (DENV1 to 4). Dengue virus is transmitted by mosquitos majorly of species Aedes aegypti and Aedes Albopictus that widespread around tropics and subtropics. The Envelope protein is the major surface-exposed antigen and the primary target of the humoral immune response, and thus the focus of vaccine design.

Specifications

Clonality

Recombinant Human IgG

Reactivity

Dengue virus E protein 1-100 a.a.

Application

ELISA, LFA

Conjugation

Unconjugated

Concentration

Lot-dependent, please refer to product label.

Buffer

Phosphate Buffered Saline containing 0.03% Proclin 300, pH 7.4.

Specificity

E (envelope) protein

Form

Liquid

Shipping

The product is shipped with polar packs. Upon receipt, store it immediately at -20°C or lower for long term storage.

Stability & Storage

This product is stable after storage at:

- 2-8°C for 2 weeks under sterile conditions from date of receipt.
- -20°C or -80°C for 12 months under sterile conditions from date of receipt.

Avoid repeated freeze/thaw cycles.

Suggestion: Divide antibody into several vials. Keep only vials for usage at 2-8°C.
