Overview

Description

Dengue virus belongs to the family Flaviviridae, genus Flavivirus and consists of four distinct serotypes (DENV1 to 4). Dengue virus is transmitted by mosquitos majorly of species Aedes aegypti and Aedes Albopictus that widespread around tropics and subtropics. The Envelope protein is the major surface-exposed antigen and the primary target of the humoral immune response, and thus the focus of vaccine design.

Specifications

Clonality

Recombinant Human IgM

Reactivity

Dengue virus E protein 1-100 a.a.

Application

ELISA, LFA

Conjugation

Unconjugated

Concentration

Lot-dependent, please refer to product label.

Buffer

Phosphate Buffered Saline containing 0.03% Proclin 300, pH 7.4.

Specificity

E (envelope) protein

Form

Liquid

Shipping

The product is shipped with polar packs. Upon receipt, store it immediately at 2-8°C for long term storage.

Stability & Storage

This product is stable after storage at:

- 2-8°C for 6 months under sterile conditions from date of receipt.

Briefly centrifuge vials before opening.
