

Human CD326, His Tag, E. coli

Catalog Number LDG06

Package

LDG066PHE

5 μg / 20 μg / 100 μg / Customized package

Background

Human CD326 also called epithelial cellular adhesion molecule (EpCAM), which is a 28 kDa protein containing 242 amino acid residues. Human CD326 is a transmembrane glycoprotein, which is a marker of cancer. CD326 induces the expression of c-myc, cyclins A & E and e-fabp which is involved the cancer cell proliferation and migration

Uniprot ID

#P16422

Synonyms

Adenocarcinoma-associated antigen, Cell surface glycoprotein Trop-1, Epithelial glycoprotein, EGP, Epithelial glycoprotein 314, EGP314, hEGP314, KS 1 /4 antigen, KSA, Major gastrointestinal tumorassociated protein GA733-2, Tumor-associated calcium signal transducer 1, Epithelial cell adhesion molecule, Ep-CAM

The product is shipped with polar packs. Upon receipt,

store it immediately at -20°C or lower for long term

Sequence Note

Gln24-Lys265

Shipping

storage.

Instruction

Reconstitution

It is recommended to reconstitute the lyophilized protein in sterile H₂O to a concentration of 200 µg/mL and incubate the stock solution for at least 20 min to ensure sufficient re-dissolved.

Stability & Storage

This product is stable after storage at:

- -20°C for 12 months in lyophilized state from date of receipt.
- -20°C or -80°C for 1 month under sterile conditions after reconstitution.

Avoid repeated freeze/thaw cycles.
