

Mouse CDNF, His Tag, E. coli

Catalog Number LDG085PME

 $5~\mu g$ / $20~\mu g$ / $100~\mu g$ / Customized package **Package**

Specifications

Species of Origin

Mouse

Affinity Tag

His Tag (C-term)

Purity

>98% as determined by SDS-PAGE analysis.

Endotoxin level

 $< 0.1 \; EU \; per \; 1 \; \mu g \; of \; the \; protein \; by \; the \; LAL$ method.

Expression system

Escherichia coli

Buffer

Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4.

Molecular weight

The protein has a calculated MW of 19.47 kDa. The protein migrates as 17-25 kDa under reducing condition (SDS-PAGE analysis).

Form

Lyophilized

Background

Background

Cerebral Dopamine Neurotrophic Factor (CDNF) also known as ARMETL1, which is a member of ARMET family. Mouse CDNF shares 80% sequence identity with human CDNF. CDNF is a 20.9 kDa neurotrophic factor containing 187 residues that widely expressed in various tissues, including embryonic and postnatal brain. Besides, CDNF shows the ability to protect the degeneration of dopaminergic neurons in Parkinson's disease, induced by 6hydroxydopamine (6-OHDA). Moreover, as a neurotrophic factor, CDNF also can repair the dopaminergic function of dopaminergic neurons.

Synonyms

Cerebral dopamine neurotrophic factor, ARMETlike protein 1, Conserved dopamine neurotrophic factor

Uniprot ID

#Q8CC36

Sequence Note

Gln25-Leu187

Instruction

Reconstitution

It is recommended to reconstitute the lyophilized protein in sterile H₂O to a concentration not less than 200 µg/mL and incubate the stock solution for at least 20 min to ensure sufficient redissolved.

Stability & Storage

This product is stable after storage at:

- -20°C for 12 months in lyophilized state from date of receipt.
- -20°C or -80°C for 1 month under sterile conditions after reconstitution.

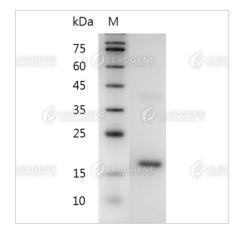

Avoid repeated freeze/thaw cycles.

Shipping

The product is shipped with polar packs. Upon receipt, store it immediately at -20°C or lower for long term storage.
